STAGES COURTS

MAINTENANCE OF SKILLS FOR THE USE OF LIVE ANIMALS FOR SCIENTIFIC PURPOSES #3: RODENT BREEDING COLONY MANAGEMENT

In addition to specific training, the use of live animals for scientific purposes requires a continuous training of 3 days every 6 years.
This training day validates one day of continuing education to be included in the skills booklet.

Dates : Voir le calendrier
Lieu : Campus Pierre et Marie Curie – Paris (Jussieu)
Tarif : 450 €

Modalité : Distanciel Présentiel

GOALS

- know how to choose an animal model the most suitable for the planned studies
- know the rules of management of a rodent facility
- be familiar with the requirements of the animal care program
- be warned about transportation rules for animals used for scientific purposes

PUBLIC & PRE-REQUISITE

Public

Technicians, engineers, researchers, teachers-researchers, doctoral students.

Pre-requisite

Basic knowledges in the use of live animals in scientific purposes .

PROGRAM

- panel of the different organisms used in animal research
- reasoned management of an animal facility :
- parameters related to reproduction
- environment-related parameters
- importance of phenotyping and genotyping of transgenic lines
- rules for developing an animal program in an animal facility
- transportation of animals used for scientific purposes

METHODS

- Lectures.
- Practical training.
- Teaching materials, bibliography and documentation are given to the participants
