STAGES COURTS

EPIGENETIC TRAINING COURSE: « INITIATION TO CHROMATIN AND METHYLATED DNA IMMUNOPRECIPITATION »

Chromatin and DNA modifications, *i.e.* epigenetic modifications, are involved in the control of gene expression. This course provides a theoretical introduction to the field of epigenetics as well as a practical training to learn the main bases of the methods for studying these epigenetic modifications.

Dates : Voir le calendrier
Lieu : Campus Pierre et Marie Curie – Paris (Jussieu)
Tarif : 2185 €

Modalité : Présentiel

GOALS

- Acquire the theoretical and practical bases necessary to analyse chromatin, chromatin proteins and DNA methylation using chromatin immunoprecipitation (ChIP) and DNA methylation (MeDIP).

PUBLIC AND PRE-REQUISITE

Public : Technicians, engineers, researchers, teachers-researchers, doctoral students.

Pre-requisite: Basic knowledges in molecular biology, bachelor level.

PROGRAM

LECTURES

- Epigenetics and chromatin: post-translational modifications of histones, chromatin remodelling complexes.
- Methylation and hydroxymethylation of DNA.
- Epigenetic diseases.
- Methods to analyse epigenetic modifications.
- qPCR for ChIP and MeDIP.
- Introduction to ChIP-seq.

PRACTICAL TRAINING

- Chromatin and methylated DNA immunoprecipitation experiments from 3T3 cells (cross-linking, chromatin extraction and fragmentation, DNA extraction and fragmentation, immunoprecipitation, qPCR, analysis of results).

METHODS

- Lectures.
- Practical training.

RESPONSABLE(S) PÉDAGOGIQUE

Frédérique Peronnet

INFORMATIONS

Competency Development Action

Category: (Article L6313-1 of the Labour Code)

Training action

Number of participants: from 8 to 16.

Language: The course can be provided in english or french upon request.

CONTACT

✉ biosciences-fc@sorbonne-universite.fr

- Teaching materials, bibliography and documentation are given to the participants.

EVALUATION METHODS

Statement of accomplishment.

HIGHLIGHTS

- Teaching method adapted to acquire the strategic tools.
 - Teaching of the latest developments in epigenetics.
 - Instructors: Professor of Genetics and Researcher, experts in epigenetics.
 - Internship organized in collaboration with Diagenode
